## **ACETIC ACID 37%**

Acetic acid 37% is a diluted form of Glacial Acetic Acid recovered from process. It performs same function as industrial grade acetic acid at equivalent dosages. It is favored in textile industry and plywood industry because of its low cost and easy usability. It is not suitable for Food grade applications.

### **PHYSICAL PROPERTIES**

Odor	Pungent Vinegar like odor
Appearance	Clear Colorless liquid
Concentration(min.) % w/w	37
Sulfuric acid	NIL
Nitrates	NIL
Chlorides(Cl)	NIL
Water Solubility	Completely Miscible
Specific Gravity At 27/27 °C	1.03-1.06

### **APPLICATIONS**

- Textile Dyeing
- Plywood Industry
- Fabric Washing

### **STORAGE AND HANDLING**

Store in a cool, dry, well ventilated place. It is a flammable corrosive liquid with low flash point so all safety precautions as per MSDS needs to be followed. Use only approved material for pumps, piping, and hoses. Please consult MSDS for appropriate safety measures.

### **PACKING**

50kg cans, 200kg drums or tanker load
